JOINT DECLARATION ON THE ESTABLISHMENT OF THE ASEAN-COORDINATED MARITIME & HUMANITARIAN RESILIENCE FRAMEWORK

Signatories: The Republic of Indonesia, Republic of Singapore, Malaysia,

Today, on the 20th of October 2030, delegations representing the Governments of Malaysia, Indonesia, Singapore, and the Maritime Shipping & Business Coalition reached a landmark consensus to establish an ASEAN-Coordinated Joint Emergency Framework,

Designed to balance immediate humanitarian relief, state sovereignty, and international supply chain continuity, all signatory parties formally agree to the following action points:

The Parties will grant priority passage to vessels carrying food, water, and essential medical supplies. Commercial maritime traffic will continue under the regime of transit passage as provided for by UNCLOS (United Nations Convention on the Law of the Sea),

Alternative Ports and Emergency Unloading

Due to the submergence of designated primary ports, relief vessels will be redirected to the nearest operational secondary ports. Cargo distribution will be executed via barges, ship-to-shore transfers, and ground transport under the operational command of the host state's national disaster management agency,

Humanitarian Airlift Operations

The Indonesian Air Force (TNI-AU), the Royal Malaysian Air Force (RMAF), and the Republic of Singapore Air Force (RSAF) will deploy air assets to transport critical relief supplies and medical personnel utilizing;

1. Fixed-Wing Transport Aircraft: For transporting bulk supplies (water, food, medicine) from regional hubs to operational airfields.
2. Rotary-Wing Aircraft (Helicopters): For direct insertion into flooded zones and medical evacuations.
3. Strategic Medevac: For transferring critically ill or injured individuals to medical facilities outside the disaster zone.

Operational Conditions for Air Assets

1. All flights shall strictly serve destinations authorized by BNPB (Indonesia) or NADMA (Malaysia).
2. Aircraft shall carry humanitarian cargo exclusively and must remain unarmed at all times.
3. The AHA Centre will manage flight schedules, and cargo manifests shall be published on a shared operational dashboard.
4. Each national air force shall operate within its respective territorial airspace, utilizing designated handoff points for cross-border transit.

Trilateral Task Force

1. Indonesia, Malaysia, and Singapore will establish a temporary Joint Task Force built upon the framework of the Malacca Straits Patrol (MSP).
2. Each Party maintains sovereign command of its respective military and law enforcement forces within its own territorial waters.
3. The Task Force will operate a shared operations center led by a rotating Chair, establishing a rapid-response protocol for maritime distress and counter-piracy operations (in accordance with UNCLOS Articles 98 and 100).
4. Aerial movements will be integrated into the Eyes in the Sky (EiS) maritime air surveillance system to prevent operational conflicts. The AHA Centre will maintain a coordination-only function.

Unified Data Channel and Joint Rumor Desk

1. The Parties and the AHA Centre will establish a Single Source of Truth dashboard.
2. Official casualty statistics (confirmed deceased, injured, and missing), displacement figures, medical data, water/food security levels, and maritime/air transport status will be verified by BNPB and NADMA prior to twice-daily publication.
3. A Joint Rumor Desk will actively monitor viral misinformation, responding within hours. Unsubstantiated claims will be flagged as "Unverified" until formal verification, with public corrections issued as necessary.
4. ASEAN and member states will amplify only verified figures through official communication channels.

Shared Emergency Fund

The AHA Centre will administer a dedicated emergency fund based on voluntary contributions from member states. Funds will be allocated strictly according to ground need, prioritizing fuel and operational flight expenditures.

Protection of Port and Logistics Workers

The Parties, in coordination with the Shipping & Business Coalition, will enforce occupational safety standards, emergency hazard pay, family support mechanisms, and expedited customs procedures for humanitarian cargo. Local workforce prioritization will apply to port reconstruction and repair operations.

Port Reconstruction Strategy

Indonesia will lead the reconstruction of submerged port infrastructure, with supporting assistance provided by ASEAN member states upon request. Execution will occur in distinct phases:

A. Immediate relief operations.
B. Comprehensive post-storm damage assessment.
C. Deployment of temporary berth facilities.
D. Full structural reconstruction.

Safeguards and Contingencies

1. Sovereignty: Nothing in this agreement compromises or alters the sovereign rights or jurisdiction of any Party. All operations remain strictly contingent upon the consent of the host state.
2. Weather Contingencies: Should weather conditions (e.g., a secondary storm) ground aerial assets, maritime bypass routes and overland roads will serve as the primary backup. Heavy bulk items will be designated for maritime transport, while high-value/urgent relief will be prioritized for airlift.
3. Deconfliction: The AHA Centre will continually schedule and sequence transport routes to prevent logistical bottlenecks.

Duration and Review

This agreement enters into force upon signature and shall remain active for a period of thirty (30) days, after which it will be subject to joint review and renewal by the Parties.

In witness whereof, the designated representatives of Malaysia, the Republic of Indonesia, the Republic of Singapore, and the Maritime Shipping & Business Coalition have signed this Joint Declaration on this 20th day of October 2030.

By standing together under ASEAN coordination, we reaffirm our commitment to protecting human life, safeguarding state sovereignty, and securing the economic future of the Strait of Malacca.

On behalf of all signatory parties, we thank the delegation and open the floor for implementation. Thank you.
